

SW351 – Senior IT Executive

Senior IT Executive with experience leading the strategy, design and operation of Enterprise grade systems and applications, and the high-performance teams necessary to develop and manage a world class IT environment. Has provided leadership in both technical and management roles, managing diverse teams tasked with projects including application development for financial processing, hybrid cloud system migration, legacy process automation and bank mergers. In most recent position, provided administration and guidance for a federally regulated, publicly traded financial institution with more than 120 offices and 1,500 employees, managing \$4.5 billion in deposits and \$7 billion in loans for 450,000 customers. Uniquely suited to not only build the internal and external relationships necessary for success, but also to effect the changes in strategy needed to create a culture of innovation and deliver efficient, scalable systems aligned to support corporate goals.
