

SW370 – Senior IT Leader

Senior IT Leader with 25+ years of experience leading/defining enterprise technology strategies across several business sectors (Banking/Finance, Insurance, Transportation, Retail). Experience directing all technology initiatives (hardware, software, support) for multiple business units, developing high-performing delivery teams with different staffing models (on-shore, off-shore, remote, multi-site), providing leadership (technical and professional) at all levels within IT departments, managing multiple data centers as well as multiple data center moves, and migrating numerous legacy platforms to upgraded, scalable, and supportable Enterprise-grade systems.

In most recent position, led efforts to upgrade all major systems for entire Insurance company (Underwriting, Claims, and IT Departments). Also, led process innovation efforts for all major IT functions: Information Security, Customer Support/HelpDesk, Database Management, Test Environment Management, Source Code Management, Change Management, Software Architecture/Development, and Project Management. Have managed and maintained high-volume, highly transactional systems that require 24/7 uptime and redundancy.

Particularly equipped to transform an IT Department into a highly-motivated, efficient, and culturally aligned team where delivering business value through the implementation of technology is the goal.
