

Synovus is – and always has been – a place where business is personal. While we have different names in different places, we are one company – Synovus. We have the strength of a major financial institution while maintaining the personal relationships you’d expect from your bank around the corner. From everyday banking to corporate services, Synovus is **the bank of here**.

Synovus began with a single act of kindness in 1888, and our passion for serving others has been growing ever since. Our roots run deep in all of the communities we serve, and we are committed to helping friends, neighbors, and customers alike achieve their goals.

Synovus is currently recruiting for this wonderful employment opportunity located at its **Columbus, GA** location:

Job Title: Credit Score Model Analyst, Senior

Job Summary:

Participates in the design and build of relevant, timely and accurate business logic within multiple credit risk applications to execute credit and pricing strategies for Consumer and Small Business applications and account management. Participates in the execution of changes made to configurable systems while adhering to strict change control processes. Responsibilities include, but are not limited to, application administration, application configuration, data analysis, reporting and model validation.

Job Duties and Responsibilities:

- Gathers and compiles data from multiple sources such as new and modified credit policy/procedures, governance meetings, regulatory requirements, efficiency initiatives and other integrating core system components to identify configuration changes as well as needed technical changes. Translates information into appropriate documentation for change.
- Uses configuration tools to populate systems with appropriate processing logic to support defined business requirements in the most effective and efficient manner.
- Participates in the execution of test plans and second review verification processes as required by change control procedures to ensure accuracy of all changes.
- Assists with developing and maintaining procedural documents, flow charts and graphs of credit risk processes/procedures that meet or exceed regulatory expectations. Assists with

creating communication documentation of system/process changes and distributes to key business and/or technical units. Provides production support for questions and any issues that may arise.

- Assists with executing processes to analyze changes to loan portfolios and prepares reports for management. Executes best-practice model validation activities to ensure models are conceptually sound and performing appropriately.
- Each team member is expected to be aware of risk within their functional area. This includes observing all policies, procedures, laws, regulations and risk limits specific to their role. Additionally, they should raise and report known or suspected violations to the appropriate Company authority in a timely fashion.

Required Knowledge, Skills, & Abilities:

- Minimum Education: Bachelor's degree in computer science, information systems, mathematics or a related field.
- Minimum Experience: Four years of job related credit experience or similar configuration background OR an equivalent combination of education and experience.
- Required Knowledge, Skills, & Abilities:
 - Strong analytical, troubleshooting and problem-solving skills.
 - Proficient in Microsoft Access, Excel and report writing tools.

***** This position requires advanced proficiency in Excel and experience with automated decision engine configuration is a plus*****

Preferred Knowledge, Skills, & Abilities:

-Financial services industry background
